Akshay Khobragade

Akshaykhobrag44@outlook.com| 8446022665 | LinkedIn

PROFILE SUMMARY

- Backend Developer with 3.4 years of experience in **Java back-end development.**
- Proficient in **Core Java, Spring Boot, Hibernate, API development**, **database design (MySQL,PostgreSQL)** and expertise in **REST APIs, Microservices** and application support.
- Strong understanding of **OOP concepts**, **design patterns**, and **collections**.
- Experienced in **Agile methodologies** with excellent **communication**, **time management**, and **leadership** skills.
- Strong **problem-solving, debugging, and code optimization skills** with delivering robust, high-quality software.
- Familiar with containerization tools**(e.g.,Docker)** and **CI/CD pipelines (Jenkins)**.

SKILLS

- **Programming Languages:** Java8
- **Core Java:** HashMap, Collections, Exception Handling, Strings, OOP Concepts
- **Frameworks:** Spring, Spring Boot, JPA/Hibernate, JUnit
- **Messaging:** Apache Kafka
- **Databases:** MySQL, PostgreSQL(pgAdmin), SQLServer
- **Version Control:** Git, GitHub
- **Markup and Styling:**HTML,CSS
- **Tools:** Docker, Postman, Apache Tomcat, Eclipse, IntelliJ IDEA, STS, Visual Studio Code
- **Servers:** Apache Tomcat 9.x

EDUCATION

Center for Development of Advanced Computing (CDAC) Hyderabad, PG-Diploma — Sept 2021

Government College of Engineering Gondwana University(GCOEC), Chandrapur , Bachelor of Engineering — Nov 2019

WORK EXPERIENCE

Software Engineer | GlobalLogic Inc — May2022–Sept2025

Project: Verizon (E-commerce Domain)

Technologies: Java8+, SpringBoot, RESTAPIs, PostgreSQL, Microservices, Git, Gitlab, Ci/Cd pipeline, Junit 5, Redis Cache, Postman

Roles and Responsibilities:

Designed and maintained REST APIs for CREDIT Check, Aggrements Page & EUP Flow & Developed Code as per User Story

- **Requirement Analysis and Project Management:** Collaborated with client to understand business requirements, manage expectations in BAs call, and provide timely updates throughout the SDLC.
- **API Development and Testing:** Designed and maintained RESTAPIs, wrote JUnit testcases, handled Exceptions and validated functionality with Postman for robust performance.
- **Code Maintenance and Support:** Managed module maintenance, resolved operational issues, and provided production support for seamless functionality.
- **Team Collaboration and Agile Implementation:** Worked with cross-functional teams to test, coordinated with Infra team for deployments(new changes/features) on Verizon application during Canary & Release, and adopt agile methodologies for improved efficiency. Tested PR(MergeRequest) on QA environments.
- **Root Cause Analysis and Continuous Improvement:** Investigated issues & monitored issues using Kibana, analyzed logs, fixed issues, worked on multiple ACT(AgileCodeTeams), iconic support, handled progression and regression defects.

ADDITIONALINFORMATION

- Knowledgeable in CI/CD pipelines for continuous integration and deployment, ensuring smoother development cycles.
- Familiar with Version Control Systems such as Git and GitHub for efficient collaboration and code management.
- Implemented JUnit test cases, and automated API validation with Postman, improving test coverage to 80%.
- Led regression testing & defect resolution, reducing production downtime by 20%.
- Knowledge of Data Structures and Algorithms, with a focus on improving software performance and efficiency.
